Scenario

For the introduction to Visual Studio for the asset Insurance Management scenario we will need to complete the following four tasks. First configure the VS environment for D365 for Fin & Ops development. Second, we will create a new model, package, and a project. Third to create an element within the project. Fourth, build the project.

Practice: Configure Visual Studio

1. Start Visual Studio (Run as Administrator),
2. Open Dynamics 365 > Options.
    a. Expand Text Editor node
    b. Select All Languages node, under Settings:
        i. Select the Word wrap check box
        ii. Select the Line numbers check box.
    c. Collapse the Text Editor node
    d. Expand the Dynamics 365 'node
        i. Select Best Practices node and check the following:
            1. BestPracticeFramework.UIRules
            2. CodeStyleRules
            3. DataAccessRules
            4. DataEntityRules
            5. DeprectatedElementsRules
            6. MaintabilityRules
            7. and StaticCodeValidationRules
        ii. Click Projects node.
            1. Verify that the Organize projects by element type check box is selected, and click OK.

Practice: Create a Project

1. On the Visual Studio menu, click Dynamics 365

Proprietary and Confidential
Subject to Change

2. Click Model Management > Create Model
    a. Model name: DevBasicAIS
    b. Model publisher: AX Developer
    c. Layer usr
    d. Version 1.0.0.0
    e. Model description: Example Asset Insurance Management System for Development Basics to illustrate and practice development tasks
    f. Model display name: Asset Insurance System
3. Click Next
4. Select Create New Package
5. Click Next
6. Select referenced models
    a. Application Foundation
    b. Application Platform
    c. Application Suite
    d. Application Workspace
    e. Directory
    f. SourceDocumentationTypes
7. Click Next
8. On Summary, ensure check boxes are checked for:
    a. Create new project
    b. Make this my default model for new projects.
9. Click Finish
10. A window will appear for creating a new project. Select Operations Project, under Dynamics 365 for Operations template.
11. Enter AssetInsuranceSystem as the Name of the project.
12. Select c:\users\axlocaladmin\documents\visual studio 2015\Projects as the project location.
13. In the Solution Name, enter AssetInsuranceSystem.
14. Click OK
