Module 07: Labels and Resources 1
Prerequisites: 2
Scenario 2
Practice: Create Labels 2
Practice: Create Resource 3

Proprietary and Confidential
Subject to Change

Prerequisites:

1. To complete this lab you will be using the VM provided to you.
    a. Login: builtin\AXLocalAdmin
    b. Password: <Available in LCS>
2. Open Visual Studio as administrator
    a. Right Click Visual Studio icon, Run as administrator
3. Exercises
    a. Model Creation & project Creation

Scenario

For the Asset Insurance Management System, we will need to create two items. The first item is a label file to hold the labels that are included for the Asset Management model. The second item is a resource containing an image file to be attached with a workspace. From the Resource folder download Insurance.jpg and copy it in the Picture folder of the VM.

Practice: Create Labels

1. In the Solution Explorer, right click the AssetInsuranceSystem Project
2. Click Add > New Item
3. Under Operations artifacts, select Labels and Resources
4. Select Label File
5. Name: aisLabelFile
6. Click Add
7. The Label file wizard will display.
    a. Ensure Label file ID: AISLabelFile
    b. Click Next
    c. Selected languages: en-US
    d. Click Next.
    e. Click Finish to create the Label File.
8. Right click aisLabelFile_en-US.label.txt, click Open.
9. Click New to create following labels

Label Id	Label	Description
ais1	Insurance Calculation Type	Asset Insurance System

Proprietary and Confidential
Subject to Change

ais2	None	Asset Insurance System
ais3	Asset Price Based	Asset Insurance System
ais4	Depreciation Based	Asset Insurance System
