Scenario

For Asset Insurance Management scenario, we will need to build two enumerations. These will aid in tracking the Insurance Calculation Type and the Payment Cycle.

Practice: Create Base Enumerations

Detailed Steps

1. In the Solution Explorer, right click the AssetInsuranceSystem Project
2. Click Add > New Item
3. Under Operations Artifacts, click Data Types
4. Select Base Enum
5. Name: aisInsuranceCalcType
6. Click Add
7. In the Solution Explorer, double click on the newly created BaseEnum and open it in Visual Studio
8. Right click on the BaseEnum AISInsuranceCalcType and click Properties
9. Set User Enum Value as No and Is Extensible as True
10. Search for Insurance Calculation Type label and set it in the label property of AISInsuranceCalcType
11. Right click the newly created BaseEnum AISInsuranceCalcType
    a. Click New Element
        - Right click on EnumValue1 > Rename
        - Name: None > click Enter
        - Right click on None, set Label to None.
    b. Click New Element
        - Right click on EnumValue1 > Rename
        - Name: OnAssetPrice > click Enter
        - Right click on OnAssetPrice, set Label to AssetPriceBased.
