Scenario

For asset insurance management scenario, we will need to build few Extended Data Types. These EDTs will be added in some existing table as fields. Few EDTs will be required in a new table as fields.

Practice: Create Extended Data Types

Detailed Steps

1. In the Solution Explorer, right click on AssetInsuranceSystem Project.
2. Click Add > New Item
3. Click Data Types
4. Select EDT Types (this will change based on type)Name: aisInsuranceCalc
5. Click Add
6. Right click > Properties and set relevant properties

EDT Type	Name	Label	Property
Dates	aisFiscalYear	Fiscal Year	Date Day = None Date Month = None Date Year = Digits4 Display Length = 4
Enums	aisInsuranceCalc		Enum Type = aisInsuranceCalcType
Enums	aisPaymentCycleList		Enum Type = aisPaymentCycle

7. In the Solution Explorer, right click the Project 'AssetInsuranceSystem'
8. Build the Project (or use Ctrl+Shift+B)
9. Review the Output screen to review process
