Module 14: X++ Coding 1
Prerequisites: 2
Scenario 3
Practice: Display method 3
Practice: Form Data Source method 3
Practice: New Form showing payment due in the Workspace 4
Try yourself 5

Prerequisites:

1. To complete this lab you will be using the VM provided to you.
    a. Login: builtin\AXLocalAdmin
    b. Password: <Available in LCS>
2. Open Visual Studio as administrator
    a. Right Click Visual Studio icon, Run as administrator
3. Exercises
    a. Model Creation & project Creation
    b. Label File Creation
    c. Base Enumeration Creation
    d. Extended Data Type Creation
    e. Table Creation
    f. Form Creation

Scenario

For Asset Insurance System scenario, a display method will be added in the aisInsurancePayment table, which will be used in the forms for showing the Asset id.

Practice: Display method

1. In the Solution Explorer, find table aisInsurancePayment in Asset Insurance System project
2. Click New Method under the method node of the table aisInsurancePayment
3. Add following display table method

```
display AssetId getAssetId()
{
    AssetTable  assettable;
    select AssetId from assettable
        where assettable.RecId == this.AssetRecID;
    return assettable.AssetId;
}
```

4. In the Solution Explorer, find form aisPremiumPaidFactBox in Asset Insurance System project
5. Right click on FormGridControl1 and add a string field
6. Set following properties
    a. Name = AssetID
    b. Label = Fixed Asset (From Label file)
    c. Data source = aisInsurancePayment
    d. Data method = getAssetId
7. In the Solution Explorer, right click the Project 'Asset Insurance System'
8. Click Build Solution (or use Ctrl+Shift+B)
9. Review the Output screen to review process

Practice: Form Data Source method

1. In the Solution Explorer, find form aisPremiumPaidFactBox in Asset Insurance System project
2. Right click Data Source > aisInsurancePayment > method (override) > executeQuery. Add the following code

```
public void executeQuery()
{
    this.query().dataSourceTable(tableNum("aisInsurancePayment")).addRange(fieldNum
      (aisInsurancePayment,PaymentDate)).value(strFmt('(PaymentDate > %1)', Date2StrXpp(dateNull())));
    super();
}
```

3. In the Solution Explorer, right click the Project ‘Asset Insurance System’
4. Click Build Solution (or use Ctrl+Shift+B)
5. Review the Output screen to review process

<u>Following are some additional exercises; these are optional</u>

Practice: New Form showing payment due in the Workspace

1. In the Solution Explorer, Right-click on Asset Insurance System project and choose Add > New item
2. Under Operations artifacts select User Interface.
3. Select Form.
4. Type “aisPremiumDueFactBox” in the Name box and click Add.
5. In the Solution Explorer, on the Asset Insurance System project, find the aisPremiumDueFactBox form, click open
6. Drag aisInsurancePayment table in the datasource
7. Specify following property values
    a. Allow Create = No
    b. Allow Edit = No
    c. Allow Delete = No
8. Right click Data Source > aisInsurancePayment > method (override) > executeQuery. Add the following code

```
public void executeQuery()
{
    this.query().dataSourceTable(tableNum("aisInsurancePayment")).addRange(fieldNum(aisInsurancePayment,
        DueDate)).value(strFmt('(DueDate < %1) && (PaymentDate == %2)', Date2StrXpp(today()), Date2StrXpp(dateNull())));
    super();
}
```

9. Select Design > Pattern as Form part Factbox Grid
10. Add a Grid under Design
11. Add following fields from the datasource aisInsurancePayment and drop them on the grid
    a. FiscalYear
    b. SerialNum
    c. PremiumAmount
    d. DueDate
12. In the Solution Explorer, right click Asset Insurance System project
13. Click Add > New Item
14. Under Operations Artifacts, Click User Interface
15. Select Display Menu Item
16. Name: aisPremiumDueFactBox
17. Click Add

18. Right click aisPremiumDueFactBox > Properties
19. Object: aisPremiumDueFactBox
20. In the Solution Explorer, find aisAssetInsuranceWorkspace under Form node
21. Under Design > Panorama (tab) > TabbedList (tab page) > FormTabControl1, add a tab page; name: PremiumDue and label: Premium Due
22. Add a Form Part control under the PremiumDue tab page
23. Set Menu Item Name property of Form part as aisPremiumDueFactBox
24. In the Solution Explorer, right click the Project 'Asset Insurance System'
25. Build the Project (or use Ctrl+Shift+B)
26. Review the Output screen to review process

Try yourself

Add a new tab page in the newly created workspace under Tabbed List showing upcoming premium payment
