Scenario

For Asset Insurance System scenario, existing Vendor master data entity will be extended to accommodate the newly added field

Practice: New field addition

1. In the Application Explorer, find the data entity vendVendorEntity and create an extension of the same
2. Add the new field AISInsuranceCalc in the field list.
3. In the Application Explorer, find the table VendVendorStaging and create an extension of the same.
4. Add the new field AISInsuranceCalc in the table.
5. In the Solution Explorer, right click the Project 'Asset Insurance System'
6. Click Build Solution (or use Ctrl+Shift+B)
7. Build will throw some error; to resolve which you might need to add reference of few other packages
8. Review the Output screen to review process

Practice: New Data Entity Creation

1. In the Solution Explorer, add new item Data Entity, named AISAssetInsurancePremium.
2. Select AssetTable as Primary Data Source
3. Rename following
    a. Public Collection Name: AssetInsurancePremiums
    b. Public Entity Name: AssetInsurancePremium
4. Select following fields
    a. AssetGroup
    b. AssetId
    c. AssetType
    d. InsuranceVendor
    e. Location
    f. Name
    g. PolicyAmount
    h. AISPaymentCycle
5. In the Solution Explorer , right click the Solution 'AssetInsuranceSystem'
6. Click Build Solution (or use Ctrl+Shift+B)
7. Review the Output screen to review process
